IMPOSSIBLE

Let's make it!

May I introduce to you: Pillen Checkouts - the cashier-furniture-pioneers. For more than 20 years, our family run business has the ambition to push boundaries in the world of checkouts. In all these years, we have always aimed for one thing: to make our customers ideas possible. Many innovations, such as the first infrared heater for checkout counters, are "Made by Pillen". All of these were made with the goal to make the checkout a place of comfort.

Engineering in-house & producing in-house

"Made by Pillen" has ever since been a trademark. We produce high-class checkout furniture which leaves nothing to be desired in terms of technique, material and ergonomics. On our company grounds, in the Dutch city of Lichtenvoorde, we also engineer your tailor made solution and put it into practice. You will benefit from the know-how of the entire Pillen Group, which has extensive experience in metal - and woodworking.

Given this firm foundation we say, with full confidence: do you have a particular Checkout idea? Ask Pillen Checkouts – we make it possible!

We are looking forward to talking to you.

Yours,
Theo Pillen

Innovations 'Made by Pillen'

- 2002:** first checkout solution in for both sitting and standing.
- 2005:** first cashdesk with printed conveying belt
- 2008:** first cashdesk with LED lighting.
- 2011:** first cashdesk with curved conveying belt.
- 2014:** first cashdesk with infrared heating.
- 2017:** first magnetic-field-free cashdesk

Shaping a retail's future.

Working conditions policies, customer service, the appearance of the store. Only a few of the numerous factors that play a role in the process from an idea till the production of the final product. Thanks to the company's design and production departments, Pillen Checkout Systems is able to respond to trends and customer preferences.

Spatial experience contributes to the feel-good atmosphere

From entering an establishment until leaving, we want your customers to feel good and be served as good as possible. Preferably by employees who love their job. Retailers therefore emphasize more and more on providing their employees with a comfortable workspace. Cutting-edge checkouts should be designed to compliment and provide to meet that goal. Moreover, checkouts should seamlessly blend in with the ambience of a business. Resulting in a need for a high degree of flexibility in design, dimensions, colours and finishes.

Individually customized solutions

By adapting to the customer's needs, the checkout area becomes an functional eye-catcher. At Pillen Checkout Systems, our professional and experienced design engineers will support you with your project. We are always able to respond quickly to new ideas because all of our products are designed, engineered and manufactured in-house in the Netherlands. Because we manufacture all the parts ourselves, we can adapt to changes and

new specifications in all stages of a project, while maintaining quality and accuracy.

Engineering your checkout with any kind of material

On our 15000+m² premises, we have multiple production facilities where we process and combine all kinds of materials. Wood, steel, aluminium, plastics and many more. Our team visualizes innovative and effective store concepts, like cash desks, counters etc. Based on the customer's specifications we create a 3D draft in our Engineering Department. These 3D visualizations are presented to the customer. After receiving the order, a complete prototype is made.

Why Pillen?

- Everything for a comfortable work space
- Supplier for the small corner store as well as for the larger retail chains
- High-quality materials
- Personal design
- Personalized design

checkouts

Transform your checkout area into an eye-catcher.

The checkout area is often the first and the last impression the customer gets and it is the place where he or she has to wait and pay. Also, the cashiers spend most of their time at their cash desk. Nevertheless, the importance of the checkout area is often underestimated. Experiences from innovative retailers and companies show that it pays to invest in a comfortable, ergonomic workplace. We are convinced that a positive experience strengthens the customer's and employee's emotional attachment to the store. Therefore we aim to bring back the personal touch onto your shopping floor with our cutting-edge checkout systems & construction elements for retail environments.

Satisfied employees - satisfied customers

Our recipe for success? For us at Pillen Checkouts it is all about the people. The result is a product portfolio that ensures a positive experience on both sides of the counter: maximum working comfort for your staff and a pleasant shopping experience for your customers. We not only provide cash desks and construction elements for retail environments, but also the perfect workplace solution tailored to your needs. The visually appealing design of your checkout zone will make it the calling-card for your market. To perfectly complete your checkout zone we offer not only intelligent light, temperature and acoustic solutions, but also extensive opportunities for the individually designed cash desks.

www.checkouts.eu

Quickly installed – quickly converted

As a pioneer in the field of checkouts, we have not only put thought into the “what” but also into the “how”. Our products all work according to the principle “Plug & Play”. Meaning: They will be delivered so that they can be directly installed and put into operation. With this concept, we not only support you with the realization of short conversion times, but it also offers the interesting possibilities, of time - and cost-efficient, and individually designable upgrades of your showroom. Thanks to vast knowledge of technology, materials, ergonomics and the market itself, we can guarantee close-to-perfect quality products.

Your benefits?

- We build with any kind of material
- Custom-made checkouts
- Complete supplier for planning, execution and installation of furnishings
- Sustainability

ergonomie &
technologie

Because a comfortable workspace simply works better.

What we learned thanks to many years of experience, is confirmed by recent studies: ergonomics in the workplace is one of the top topics that modern employers nowadays have to deal with. We are familiar with the current legislation and we are able to advise you when it comes to the rules for workplace ergonomics. For many years, we've focused on ergonomics and that is how we've achieved above average quality products. Therefor creating the optimal workplace for your employees which results in less non-attendance. Also our ergonomically perfect accessories can complete your cash desk to make it ready to fit the needs of the future.

Natural heat

Cold in the workplace is not only uncomfortable, but lowers the health and work performance of your employees. The convenience of individual heating in the workplace increases the feel-good factor for your cashiers and clearly increases their motivation and satisfaction. Adjust the temperature individually for every workplace with our infrared heating and improve the environment for your employees with comfortable, natural and healthy warmth. You have the choice between a ceiling element above the workplace, a wall-mounted or a free-standing model. The infrared panels are equipped with a printable, textile. These textiles can be printed according to your individual wishes or choose one of our modern and nicely decorated standard motifs.

www.checkouts.eu

Pleasant light

Light plays a decisive role in the perception of an environment. With our LED lighting, your workplaces will be upgraded with an excellence of light. The intensity of our LED lighting is modelled after natural light. It raises the feel-good factor. Your employees can concentrate better, which increases the productivity, safety and pleasure at work. Our LED fixtures are lightweight and available in different shapes: oval, round, rectangular and square. And also special formats are possible for us: we find the tailor-made solution for you.

Our offer?

- Efficient and sustainable
- Improves concentration and productivity
- Uses energy efficiently
- Promotes health
- A tailor-made solution

displays &
terminals

Unique spatial experiences.

Do you dream of apples and pears floating above the fruit and vegetable section as a ceiling element? Or do you want to give your wine department the ambience of a wine cellar? Anywhere where more spatial experience or intimate spaces are to be created, we offer individual solutions in the form of fully customizable ceiling elements.

Displays and presentation solutions

The ideas which customers assign us with are as individual as they are demanding. We are capable of developing almost any idea or concept into a cutting edge designed product. In our own development and production departments we can produce many different variants of display and presentation solutions. Our displays are available in a wide variety of finishes. We design and produce them specifically to your needs. Where most companies focus on just one material, our design can include a mix of several materials, such as metal, wood, aluminium or plastics. Thanks to our own powder coating plant and our sublimation printing machine, we can offer you many different possibilities. Of course our consultants will support you with their many years of experience, making the right choices for your project. Together we'll upgrade your facility, generating a positive spatial experience and well-being for your employees and your customers.

www.checkouts.eu

Invest less & achieve more

Our passion is to redesign existing shop fittings with fresh ideas and low financial outlay. Modern technology allows us to reduce investments for production and assembly to a minimum. Our lightweight ceiling panels are supplied "Plug & Play", they are very suitable to achieve much with little effort. These ceilings consist of aluminium clamping profiles as a basis on which an individually printable fabric is stretched over. This special textile allows any desired print. We build these ceiling elements in all kinds of shapes. Custom frames are of course also available in almost any desired shape according to customer requirements. Because they are lightweight, no structural changes are required.

What do we offer you?

- Innovative design
- Unique spatial experiences
- High-quality materials
- Customized solutions
- Integrative concepts for your business
